## Informed Consent and Authorization for Chiropractic Treatment

You have the right, as a patient, to be informed about the condition of your health and the recommended care and treatment to be provided so that you may make the decision whether or not to undergo such care after being advised of the known risks. This disclosure is not meant to frighten or alarm you. It is simply to make you better informed in order that you may give or withhold your consent.

The profession of chiropractic (along with dentistry, medicine and surgery, nursing, optometry, osteopathic medicine and surgery, pharmacy, physical therapy, psychology, and others) are regulated in the state of Iowa under Iowa Code Chapter 147. Patient care and treatment provided by those above listed professions have known risks, which may include death, brain damage, quadriplegia, paraplegia, the loss or loss of function of any organ or limb, or scars.

Chiropractic is a science which concerns itself with the relationship between structure and function of the body, since it may affect the restoration and preservation of health. Adjustments are made by chiropractors to correct spinal and extremity joint misalignments. Adjustments are performed following an examination which may include, but not limited to spinal and physical examination, orthopedic and neurologic testing, palpation, and radiology examination.

An adjustment is the application of a quick, precise movement over a very short distance to the spine or extremity. There are a number of different adjusting techniques, some utilizing specially designed equipment. Adjustments are usually performed by hand but may be performed by hand-guided instruments. In addition, physiotherapy and/or rehabilitative procedures may be included in the management protocol.

Not only should you understand the benefits of chiropractic care and treatment in restoring and maintain good health, but you also should be aware of the existence of some inherent risks and limitations. These are seldom enough to contraindicate care, but should be considered in making the decision to received chiropractic care. All health care procedures, including those used in carrying degrees, have some risks correlated with them. Risks correlated with some chiropractic adjusting procedures may include musculoskeletal sprain/strain, neurological injury, fracture, vertebral artery syndrome including stroke and perhaps, death through complicating factors. Risks correlated with physiotherapy may include not only the foregoing but also allergic reaction, muscle and/or joint pain.

I have been informed of the nature and purpose of chiropractic care, possible consequences and risks of care, including risk that care may not accomplish the desired objective. Reasonable alternative treatment has been explained, including risks, consequences, and probable effectiveness of each and I have been advised of the possible consequences if no care is provided. I acknowledge that no guarantees have been made to me concerning the results of treatment and care.

**I HAVE READ THE ABOVE PARAGRAPHS. I UNDERSTAND THE INFORMATION PROVIDED AND IT HAS BEEN EXPLAINED TO ME. ALL QUESTIONS WHICH I HAVE ASKED HAVE BEEN ANSWERED TO MY SATISFACTION. HAVING THIS KNOWLEDGE, I KNOWINGLY AUTHORIZE BAKERIS FAMILY CHIROPRACTIC TO PROCEED WITH CHIROPRACTIC CARE AND TREATMENT.**
